

AVC-BKT 001

Robust. Affordable. Reliable.

The Avocor Universal bracket has a simple mounting plate that is functional for displays up to a Max weight of 150kg. Suitable for VESA mounting patterns of maximum dimensions 800 x 400mm and a minimum 200 x 200mm.

The Avocor Wall Bracket is simple to install, and the hole patterns have been designed such that the bracket fits exactly between two wall studs. There is lateral adjustment that allows for up to 215mm of post installation positioning and the integrated safety screws deter theft and secures the display in place.

One size fits all

This universal wall bracket has been designed for displays with mounting patterns up to 800mm x 400mm.

Heavy Weight Ready

The Avocor Wall Bracket provides you with a maximum weight capability of 150kg.

Low Profile design

Holding the display only 32mm from the wall provides a sleek and professional finish to the installation of your interactive display.

Easy Installation

This easy installation wall plate allows a positioning bolt to be installed using the pre-drilled keyhole installation point.

Post installation adjustment

Lateral display adjustment allows for up to 215mm for post installation adjustment.

Included in the box

Also included in the box is a screw kit with all necessary display attachment hardware.

Warranty - 5 year Return To Base
