SAFETY PRECAUTIONS

Please read all instructions before attempting to unpack, install or operate this equipment and before connecting the power supply. Please keep the following in mind as you unpack and install this equipment:

- Always follow basic safety precautions to reduce the risk of fire, electrical shock and injury to persons.
- To prevent fire or shock hazard, do not expose the unit to rain, moisture or install this product near water.
- Never spill liquid of any kind on or into this product.
- Never push an object of any kind into this product through any openings or empty slots in the unit, as you may damage parts inside the unit.
- Do not attach the power supply cabling to building surfaces.
- Use only the supplied power supply unit (PSU). Do not use the PSU if it is damaged.
- Do not allow anything to rest on the power cabling or allow any weight to be placed upon it or any person walk on it.
- To protect the unit from overheating, do not block any vents or openings in the unit housing that provide ventilation and allow for sufficient space for air to circulate around the unit.
- Please completely disconnect the power when the unit is not in use to avoid wasting electricity.

1. INTRODUCTION

This HDMI over HDBaseT Receiver is a great solution for extending UHD video and audio as well as Ethernet and control via a single run of Cat.5e/6/7 cable over distances up to 70 meters. This extender complies with the advanced HDCP 2.2 and HDMI 2.0 standards, as well as supporting the legacy HDCP 1.x and HDMI 1.x standards. In addition, despite HDBaseT's 10.2Gbps bandwidth limitation, 4K UHD HDMI video sources, up to and including 4K@60Hz (4:4:4, 8-bit) as well as 10/12-bit sources with HDR, are able to be processed and extended by the use of AVLC (Adaptive Visually Lossless Compression) when needed. Multiple data and control interfaces are also able to be extended, including IR, RS-232, and LAN connections.

This unit supports bi-directional 24V PoC (Power over Cable) allowing the system to be completely powered by, or provide power to, a compatible connected Transmitter, allowing for greater flexibility within different installation scenarios.

2. APPLICATIONS

- Household entertainment sharing and control
- Lecture room display and control
- Showroom display and control
- Meeting room presentation and control
- Classroom display and control

3. PACKAGE CONTENTS

- 1×HDMI to HDBaseT Receiver with Bi-directional 24V PoC
- 1×3.5mm to IR Extender Cable
- 1×Operation Manual

4. SYSTEM REQUIREMENTS

- HDMI receiving equipment such as an HDTV, monitor or audio amplifier.
- An HDBaseT Transmitter equipped with AVLC and 24V PoC support is strongly recommended.
- The use of "Premium High Speed" HDMI cables, and industry standard Cat.6, Cat.6a or Cat.7, is highly recommended.

5. FEATURES

- HDMI with HDR, 3D & 4K@60Hz support, DVI 1.0 compatible
- HDCP 1.x and HDCP 2.2 compliant
- Supports up to 4K UHD (18Gbps, 4K@50/60Hz 4:4:4, 8-bit) video input and output
- Supports Deep Color input and output up to 12-bit
- Supports 10-bit and 12-bit HDR (High Dynamic Range) input/output
- Supports CEC bypass
- HDBaseT feature support: HD Video and Audio, 24V PoC and Control (bi-directional IR/RS-232 pass-through)
- HDBaseT input receives video, audio and data over a single Cat.5e/6/7 cable and can reach distances up to 70m/230ft at 1080p and 40m/131ft at 4K when using Cat.6a/7
- Integrated AVLC (Adaptive Visually Lossless Compression) activates when the bandwidth requirements of the source are beyond 10.2Gbps (340MHz) allowing for support of sources up to 18Gbps (600MHz) with no loss of visual quality
- Supports pass-through of many audio formats including LPCM 2.0/5.1/7.1, Bitstream, and HD Bitstream
- Bi-directional 24V PoC allows the unit to be powered by, or provide power to, a compatible connected Transmitter

Note: The 24V PoC function is designed to power, or receive power from, compatible Transmitter units only. Non-PoC Transmitters will need their own power supply. Other brands of Transmitter may not be compatible.

6. OPERATION CONTROLS AND FUNCTIONS

6.1 Front Panel

- 1 ISP Pinhole:** This button is reserved for factory use only.
- 2 STD/UPDATE Switch:** This switch is reserved for factory use only.
Note: This should be left on the default setting of "STD" for normal operation.
- 3 RS-232 Port:** Connect to a PC, laptop, or serial controllable device for the extension of RS-232 signals between both ends of the HDBaseT connection.
- 4 POWER LED:** This LED will illuminate to indicate the unit is on and receiving power.
SYNC LED: This LED will illuminate when a live input source is detected.

6.2 Rear Panel

- 1 **DC 24V Terminal Block:** Plug the 24V DC power adapter into this terminal block and connect it to an AC wall outlet for power. (Optional)

Note: This connection is not required if the unit is receiving power via 24V PoC from the Transmitter.

- 2 **IR BLASTER Port:** Connect to an IR Blaster to transmit IR signals from the other end of the HDBaseT connection to devices within direct line-of-sight of the IR Blaster.
- 3 **IR EXTENDER Port:** Connect to the provided IR Extender to receive IR control signals and extend them to devices connected to the other end of the HDBaseT connection. Ensure that the remote being used is within direct line-of-sight of the IR Extender.
- 4 **CAT5e/6/7 IN Port:** Connect to a compatible HDBaseT Transmitter with a single Cat.5e/6/7 cable for transmission of all data signals. 24V PoC can also be supplied to, or received from, a connected compatible Transmitter.

Note: The 24V PoC function is designed to power, or receive power from, compatible Transmitter units only. Non-PoC Transmitters will need their own power supply. Other brands of Transmitter may not be compatible.

- 5 **HDMI OUT Port:** Connect to an HDMI TV, monitor, or amplifier for digital video and audio output.
