

MONITOR ARM

FSA

It is important to pick the correct monitor arm depending on the needs of your office. Two of the main things to consider when choosing the right monitor arm are the weight of the monitor and how many monitors are mounted; single or dual monitors. The FSA (Flat Screen Arm) monitor arm range has been designed to hold the latest screen technology, allowing the end user to adjust height, angles and viewing preferences, which in return helps employees reap the rewards of correct posture in the work place.

FEATURES

- Three Mounting Options:
