I. Button Introduction

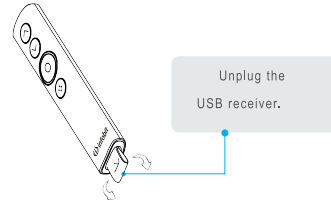

- ① Previous/Up: Click the button to go to previous page or rewind your video.
- ② Next /Down: Click the button to go to next page or fast forward your video.
- ③ Do/Execute Function: Long press the button to performing different functions.
- ④ Select Function: Click to shift to different function, such as Mouse,Spotlight,Digital laser, Zoom, Mark.

II. How to start

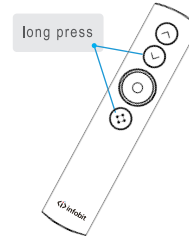

As show in the following pictures, first, connect USB cable to your computer and install the software of the presenter which is ready in built-in USB RAM.

Second,unplug the USB receiver and connect it to your personal computer and activate the drive.

Third, long press the NEXT button and the SELECT FUNTION button together, you will see the flash green light on the top side, and the device will vibrate about 1s, means receiver and the clicker match successfully.

If the green light is off in 20s and there is no vibration, means match fails, please unplug the USB receiver and start the procedure over again.

For the first time you plug the USB receiver into your personal computer after you Unpack the remote, the system will install software of the remote automatically and successfully in 30 second, restart or try another USB port of the computer if the Installation process goes too slow or failed. When the software installed successfully,click any button of the remote, if you feel the vibration of the remote, start to use and enjoy your presentation.
